

Station Locations and 30-year Normals

Weather Bureau Army Navy (WBAN) number, station location (City and State), geographic coordinates (latitude and longitude) and elevation (m M.S.L.) of the 237 meteorological stations used to create a coordinated climatological dataset for AgDisp, PRZM, and EXAMS. Primary SAMSON (Solar and Meteorological Surface Observation Network) stations (those with measured solar radiation data for at least one year) are in bold type. Annual air temperature and precipitation normals from [1]. LRR is Land Resource Region, MLRA is Major Land Resource Area [2]. Stations in *italic* lack hourly precipitation data; all stations include total daily precipitation.
